

Installation

To install Navigate Pro on a Dynamics Nav database:

1. Install the updated license on your Dynamics Nav Service and restart the service.
2. Copy the NavigatePro.zip file on the server, where Dynamics NAV Application Server is installed (be sure to have the proper permissions).
3. Unzip it in a folder of your choice. The file contains all the supported versions of Navigate Pro.
4. Run Windows PowerShell ISE as Administrator.
5. Be sure your user has Execution policy unrestricted.
6. Open CopyAddinFiles.ps1 script file for the version you want to install, check all the paths, modifying them where needed. Follow the instructions in the script file.
7. Save the script and press F5 to run it. You should find all the add-in in Dynamics NAV addin subfolders.
8. Close the CopyAddinFiles.ps1 script and open the DeployExtension.ps1 script file. Follow the instructions in the script file.
9. Check all paths and file names, according to your previous choices.
10. Save the script and press F5 to run it. Note: the script will prompt a message asking to delete NAVIGATE PRO permission set. Skip the operation if the permission set already exists.
11. From NAV, open the page "Control Add-ins", select the line GraphicalFlow, press Import and select Manifest.zip file, in the subfolder "Resource" (Repeat in the same way for Graphical_Flow_JS, importing Manifest_JS.zip files).

Control Add-ins

Show results:

Where Add-in Name is Enter a value.

+ Add Filter

Add-in Name	Public Key Token	Version	Category
Graphical_Flow_JS	d455b966fcb14209	1.0.0.0	JavaScript Control Add-in
GraphicalFlow	6ea550bd2e658edf	1.0.0.0	JavaScript Control Add-in
Microsoft.Dynamics.Nav.Client.BusinessChart	31bf3856ad364e35		JavaScript Control Add-in

New Manage Control Add-in Resource View

12. Permission management: for each users that must use Navigate Pro, insert into user permission set, the line NAVIGATE PRO:

User Permission Sets			
 Permissions	 Nuovo	 Trova	 Filtro  Cancella filtro
Permission Set	Description	Company	Extension Name
NAVIGATE PRO	Role for Navigate Pro		

13. Now the package Navigate Pro is ready to be used.
